In 1997, Dr. Richard Bartlett experienced an event that would redirect the entire course of his life. He suddenly discovered that by lightly touching his clients while at the same time applying focused intent, he could restore them to a physically, mentally, and spiritually balanced state, instantly shifting misalignments that had plagued them for years. Most astonishing of all, he could teach anyone how to do this. Now, for millions of people looking for empowerment in an age of declining and impersonal healthcare, Dr. Bartlett shares this phenomenon in a book full of explosive potential. In Matrix Energetics, Dr. Bartlett builds upon his popular seminars to teach us how to access the discovery he has made -- a process that merges the science of subtle energy with our innate imaginations to produce measurable results. By applying forces known to modern physics, each of us can tap into states of healthy awareness from different moments -- in essence, travel in time -- and bring them into the present for immediate, profound results. As Dr. Bartlett clearly shows, this practice requires no special training, produces transformation in the blink of an eye, and is available to everyone who has a willingness to learn. Matrix Energetics, The Science and Art of Transformation, provides an easily-reproducible, results-oriented process of change that draws on the fundamental principles embraced by the field of quantum physics. This paradigm-busting book can teach anyone how to access their creative power to heal and transform their lives. Dr. Richard Bartlett discovered that what he once thought about the human body was just the tip of the iceberg -- after seeing change beneath his hands, and hearing about the invisible transformations that were often revealed later -- he knew that he had to pass along what he had discovered.
